Experience

IT Technician Support

Digital Systems World | Cairo, Egypt

April 2023 – June 2025

- Provided first-line IT support for employees, resolving hardware and software issues efficiently.
 - Installed, configured, and maintained network devices (routers, switches, access points).
 - Assisted in managing user accounts, permissions, and shared network resources.
 - Performed system updates, antivirus management, and basic backup tasks.
 - Documented IT procedures and troubleshooting steps.
- CCTV Installation & Surveillance Technician**
(Part-Time / Freelance) 2022 – 2023
- Installed and configured CCTV systems for homes and small businesses.
 - Worked with both analog and IP cameras

Projects

Maintained and repaired **over 50 personal and family computers**, performing hardware troubleshooting, OS installations, software updates, and virus removal.

Designed and implemented a **home network connecting 15+ devices**, including router configuration, IP assignment, and internet sharing.

Conducted **cybersecurity exercises** using Kali Linux, Nmap, and Wireshark, documenting results for self-learning.

Completed **50+ basic graphic design projects**: logos, banners, and visual edits.
